

Using diff (VS Code)

Note: Include required commands and screenshots below in Assignment 1 README file.

1. Download and unzip **diff.zip** file into your "skillsets" subdirectory, in your "**lis4331**" repo. Leave the directory named **diff**
2. **Objective:** Using VS Code, compare provided files:
Compare "stable" configuration file (**config_new.json**), with "legacy" file (**config_old.json**) to identify changes.
3. *****MUST***** use command line to compare files! Show command!

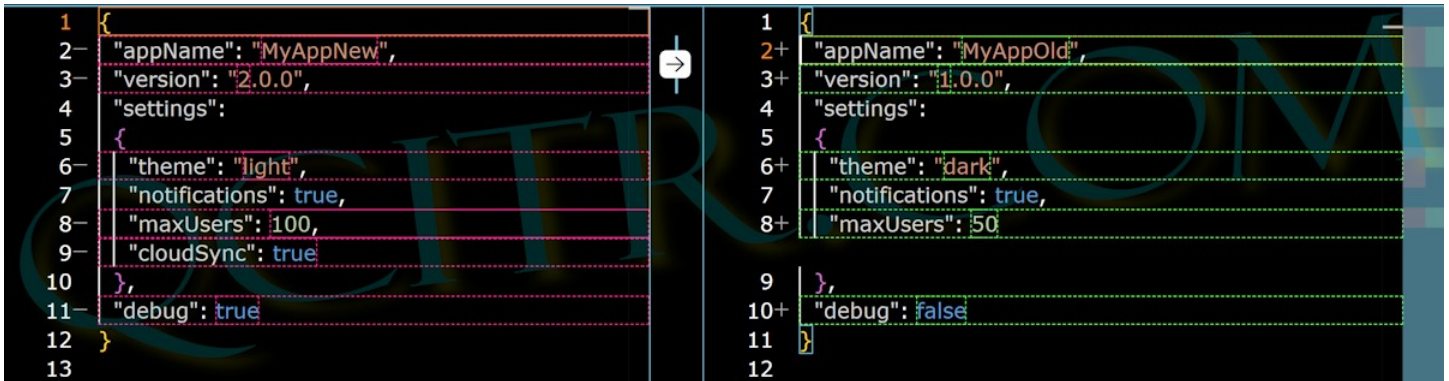

Example:

C:\webdev\repos\programming\diff>C:\vscode\code --diff config_new.json config_old.json

YOUR command line answer here:

4. Display diff comparison files screenshot in VS Code:

Example:

5. Display "fixed" diff comparison files screenshot in VS Code:

Example:
